

AGRICULTURE WORKS HARD FOR

▶ CLARK COUNTY

Family-owned farms, food processors and agriculture-related businesses generate thousands of jobs and millions of dollars of economic activity for Clark County, while contributing to local income and tax revenues.

Agriculture's annual impact:

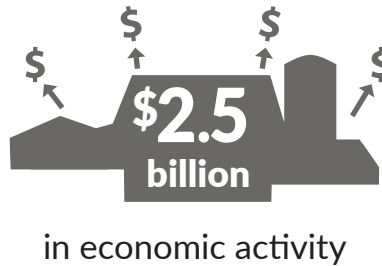

WHAT DO OUR FARMS PRODUCE?

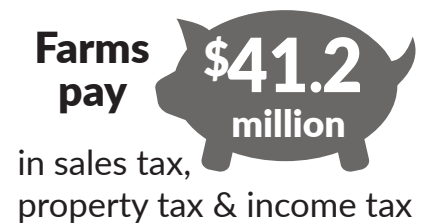

HOW MANY PEOPLE DOES AGRICULTURE EMPLOY?

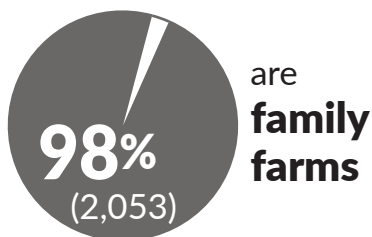

WHAT IS THE ECONOMIC IMPACT?

HOW MUCH TAX DOES AGRICULTURE CONTRIBUTE?

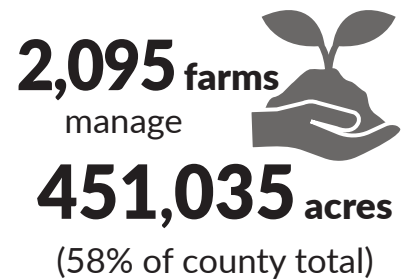

WHO OWNS THE FARMS?

HOW MUCH IS SOLD LOCALLY?

WHO TAKES CARE OF THE LAND?

THE AGRICULTURE SECTOR BENEFITS THE ENTIRE COUNTY

A population of 34,000 people and 160,000 livestock make Clark County the perfect snapshot of “Rural Wisconsin.” A large volume of dairy production and a great volume of dairy processing encompass what makes Clark County unique. Boasting the title of the Number 1 butter producer in the U.S., Clark County provides diversity in agriculture, production (with numerous greenhouses in the county), and a fresh market produce auction doing business three times a week during the growing season. Clark County is home to a tremendous infrastructure that supports the agriculture enterprises throughout the county. Agriculture literally drives the Clark County economy.

Did you know?

CLARK COUNTY IS
No. 1 in Wisconsin’s
 dairy industry & **No. 18**
 in the United States

Extension
 UNIVERSITY OF WISCONSIN-MADISON

The University of Wisconsin–Madison Division of Extension is part of the local and statewide network of organizations and agencies that support Wisconsin’s \$104.8 billion agriculture industry. Extension helps enhance the economic impact of agriculture by providing research-based information that increases farm profitability, improves food safety, reduces environmental impacts and expands agribusiness networks.
