University of Missouri
Why Entrepreneurial Ecosystem Building?
Why Entrepreneurial Ecosystem Building?

• EE increase the quantity and quality of entrepreneurial activity
  • Sending more entrepreneurs to SBDC
  • Sending higher-quality ventures to SBDC!

• EE Building:
  • Encourages dynamism (competition, innovation)
  • Creates a “buzz” around entrepreneurship
    • Attracts more entrepreneurs and investment
    • Creates spillovers and in-turn more creative destruction
    • All this leads to economic and cultural benefits
Why Entrepreneurial Ecosystem Building?

• Equitably enhancing entrepreneurship.
  • Inclusive approach.
  • Can benefit historically underserved.

• More consistent with portfolio approach.
  • Develop multiple assets.
  • Avoid “picking winners.”
  • Reduce vulnerability to losses in a particular firm or industry.
Why Entrepreneurial Ecosystem Building? Networks!

- Entrepreneurial networks are weak in parts of rural America
  - Negatively impact entrepreneurial successes
  - Entrepreneurial networks define entrepreneurial regions
- Entrepreneur-to-entrepreneur networks are vital; however, entrepreneurial networks must contain more than supportive fellow entrepreneurs
- Community leaders, elected officials, educators, are a vital part of the ecosystem

- Can you think of would-be entrepreneurs who have been discouraged from starting a business?
- Is your community supportive of entrepreneurs, risk-taking, and “doing things differently?”
What is an Entrepreneurial Ecosystem?

Answer: it varies!
What is an Entrepreneurial Ecosystem?

• We use the term ecosystem to emphasize the importance of networks and systems in fostering entrepreneurship.

• OECD definition: An entrepreneurial ecosystem is a set of locally interconnected entrepreneurial:
  • Actors (e.g., current and aspiring entrepreneurs)
  • Organizations (e.g., businesses, banks, VCs)
  • Institutions (e.g., universities, governments)
  • Processes (e.g., entrepreneurial ambition and acceptance)
Components of entrepreneurial ecosystems

• Many different descriptions exist, but they are all pretty similar!
Components of a rural entrepreneurial ecosystem

We need to build an entrepreneurial ecosystem that includes:

• Leaders/culture supportive of risk-taking, innovation and entrepreneurship
• Technical assistance providers
  • Lenders, lawyers, accountants
• Specialized infrastructure (e.g., broadband)
• Available workforce
• Market access

Components of an entrepreneurial ecosystem

Example: Kansas City
How to build entrepreneurial ecosystems

Answer (again): it varies!
How to build an entrepreneurial ecosystem?

• Creating an entrepreneurial ecosystem requires a community to think about the environment in which firms operate and not about a specific business
  • How can we make our region more entrepreneur-friendly?

• There is no recipe for entrepreneurial ecosystem development, each region has:
  • a unique set of people, institutions, and existing networks
  • a unique culture and history
  • unique assets, markets, policies
  • What assets makes your community/region unique?
Some Building Components of the Ecosystem

• Broadband (infrastructure)
  • More access to broadband → more start-up activity
  • Especially among small, rural, and women-owned businesses

• Small Business Lending (capital)
  • More small business lending → more start-up activity
  • Access to financial capital could include credit unions, CDFIs, loan funds, local investment groups, CSEs

• Childcare (infrastructure)
  • More childcare → More self-employment
  • Owners are entrepreneurs themselves.
  • Necessary service to support other entrepreneurs.

• Social capital (culture)
  • Networks, norms, and trust
  • Leverage to support entrepreneurs

Look for Cooperative Extension resources! →
Share of Population with Access to Broadband (FCC Form 477):
- State of Wisconsin: 92.3%
- United States: 94.8%

Share of Households without Internet Access (ACS):
- State of Wisconsin: 15.8%
- United States: 15.8%
Broadband

• Attracting new businesses, fostering entrepreneurship, enhancing farm profits.

• More startup activity in places with greater access.
  • Effect is even larger in the most remote rural counties.
  • Also larger for small and women-led businesses.
  • Download speed more important than upload
  • Variations by industry.
Broadband Opportunities

• Focus on adoption?

• Less than ¼ of federal spending on rural expansion has gone toward affordability/adoption.

• Important for attracting private investment.
  • Affects the take rate

• Affordability
  • Assistance for households who could utilize programs
    • Subsidy?
  • Cost of infrastructure
  • Competition and alternative models
    • Models other than profit maximization

• Preferences
  • Value and willingness to pay
  • Digital literacy
Lending has been slow to recover from the recession.
Financial institutions and branches have declined in Wisconsin.
Financing Opportunities

• Community Supported Enterprise
  • Community ownership of a business
  • Community membership to a business

• Rotating Loan Funds

• Credit Unions

• Community Development Financial Institutions
Childcare

• Childcare availability boosts labor force participation and self-employment.
  • Female labor force participation is 5-10 percentage points lower than for males
  • Female labor force participation reached its lowest point in decades during the recession.
Childcare desserts are common.
Childcare Opportunities

• Resources from Extension
  • Bootcamp

• Shared Services Model

• Childcare cooperatives
  • Employee/business/parent-owned

• Engaging the broader community
  • Using the schools
Foreign Born Entrepreneurs

- Foreign-born individuals are more than twice as likely to start a business than native-born citizens
- International students founded 1 out of every 4 U.S. startups valued >$1B
- Midwest tends to have fewer foreign-born residents
  - 5% of WI population, 5% of entrepreneurs
  - 13.5% of U.S. population, 16% of entrepreneurs
Wisconsin has low domestic in-migration.

(2011-2015 5-year Estimates)
Per 1000 Population Age 18 to 64 with a Bachelor’s Degree
“Lots of cool things are going on in rural America,” says Mary Ann Kristiansen, founder of the Hannah Grimes Marketplace and the Hannah Grimes Center for Entrepreneurship in Keene, N.H. Among those “cool things” is the way older adults have been embracing entrepreneurship in rural communities.

Some of the older entrepreneurs are moving to rural towns for the low-cost, easygoing lifestyle. Others already live there and have decided to start businesses as their encores.
Social Capital and In-Migration

• Placemaking
  • Entrepreneurs are footloose.
  • UW-Extension Placemaking team

• Near and newly-retired populations
  • High human capital/financial capital
  • Age-inclusive programming and initiatives

• Foreign-born population
  • Immigrants nearly twice as likely to become entrepreneurs
Connecting Entrepreneurial Communities

• Seven states’ cooperative extension co-hosted a virtual conference
  • Michigan, Minnesota, Nebraska, North Dakota, South Dakota, Pennsylvania, New Hampshire and Missouri in November, 2020
  • 314 participants
  • 43 virtual sessions

• Creating (Connecting) Entrepreneurial Communities conferences in many states
CREATING ENTREPRENEURIAL COMMUNITIES

Hannibal, Missouri
Sept. 29-30, 2021
Homegrown: Entrepreneurship in your Community—An entrepreneurial ecosystem curriculum

This day-long workshop helps participants create a supportive entrepreneurial ecosystem so that entrepreneurs get supportive signals from community leaders.
Others Are Building Entrepreneurial Ecosystems
Example: Northwest Missouri
Example: Entrepreneurial ecosystem building

• Northwest Missouri
  • Original goal: create a regional system that supports innovative entrepreneurship
  • Coordination, culture and lack of broadband infrastructure were barriers to entrepreneurship in the region
  • Engaged with MU Extension-Exceed for data, research and analysis, facilitated community conversations, and strategy recommendations
  • Also engaged with Don Macke and other consultants

• Good examples of collaboration and strength utilization
  • KC SourceLink & MO SourceLink
  • Good engagement (Maximize NWMO), RPC collaboration
  • Technical assistance provision a priority, Facilitation groups
  • Political capital
  • Two universities

• People focus is next (placemaking, quality-of-life)
1. Pipeline of entrepreneurs

• Survey indicated internships were needed
• Focus groups identified initiatives to build entrepreneurial pipeline
  • Entrepreneurship curriculum at all levels
  • Youth entrepreneurship programming
    • MO AfterSchool Network Youth Entrepreneurship Initiative
  • Incubators
  • Target training at immigrants and minorities
  • Mentoring
  • Succession Planning
• COGs, schools and planners implementing
2. Cultivating technology exchange and innovation

• “We need people that are motivated to change the status quo”

• Survey respondents “slightly more negative than positive” on technical assistance offered by regional educational institutions

• 67% responded false to “The region is a welcoming, tolerant, and attractive place for people of diverse backgrounds”
  • The region may benefit from increased focus on promoting the importance of diversity in communities
3. Access to financial capital

- **Access** to capital was a challenge, but more so **affordability**
- Evaluate what types of capital are needed in your region?

<table>
<thead>
<tr>
<th>Loan Type</th>
<th>Typical Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seed Money</td>
<td>$1,000 - $5,000</td>
</tr>
<tr>
<td>Micro Loan</td>
<td>$5,000 - $10,000</td>
</tr>
<tr>
<td>Gap Financing</td>
<td>$10,000 - $250,000</td>
</tr>
<tr>
<td>Venture Capital</td>
<td>$250,000+</td>
</tr>
<tr>
<td>Conventional Loan</td>
<td>Any amount</td>
</tr>
</tbody>
</table>

- Individuals’ awareness of resources also vary
  - Work with Facilitation groups to increase awareness of existing programs
4. Talent and networks

• The most common network mentioned was the presence of downtown development organizations in several communities (Missouri Main Street)

• Investing in downtown areas:
  • Makes a community more attractive for its own residents
  • Helps provide opportunities for local entrepreneurs to do business and connect with their community

• Focus groups emphasized the need to invest and develop more regional networks to help connect entrepreneurs, investors, support organizations, mentors, etc.
5. Broadband access

• The region is actively trying to increase broadband access, adoption and affordability
  • Facilitated community groups
  • Partnerships with local ISPs
  • Project OVERCOME pilot

Administered by U.S. Ignite, Funded by NSF and Schmidt Futures $300,000 for 1 year period of performance (3/1/21 – 2/28/22)
https://www.us-ignite.org/program/overcome/
