

AGRICULTURE WORKS HARD FOR ▶ GREEN LAKE COUNTY

Family-owned farms, food processors and agriculture-related businesses generate thousands of jobs and millions of dollars of economic activity for Green Lake County, while contributing to local income and tax revenues.

Agriculture's annual impact:

WHAT DO OUR FARMS PRODUCE?

HOW MANY PEOPLE DOES AGRICULTURE EMPLOY?

WHAT IS THE ECONOMIC IMPACT?

HOW MUCH TAX DOES AGRICULTURE CONTRIBUTE?

WHO OWNS THE FARMS?

HOW MUCH IS SOLD LOCALLY?

WHO TAKES CARE OF THE LAND?

THE AGRICULTURE SECTOR BENEFITS THE ENTIRE COUNTY

Green Lake County is a county of farming diversity; there is every type of operation from small niche market farms to mega grain and dairy. What really makes the county’s farmers unique is the attention they give to soil and water quality. Year after year the number of acres planted into cover crops grows as does the number of farmers adapting the practice of no-till. The topography of the county lends itself to fruit production and the loamy soils to a variety of field crops, including vegetables. The picturesque landscape attracts agri-tourists who come to experience a different kind of life on the various destination farms dotting the gently rolling hills of the county.

Did you know?

GREEN LAKE COUNTY IS
No. 9 in Wisconsin’s
vegetables industry

Extension
 UNIVERSITY OF WISCONSIN-MADISON

The University of Wisconsin–Madison Division of Extension is part of the local and statewide network of organizations and agencies that support Wisconsin’s \$104.8 billion agriculture industry. Extension helps enhance the economic impact of agriculture by providing research-based information that increases farm profitability, improves food safety, reduces environmental impacts and expands agribusiness networks.
