UNIVERSITY OF WISCONSIN-MADISON  
ORGANIZATIONAL AND LEADERSHIP  
DEVELOPMENT PROGRAM

Today's meeting was made possible by a grant from the  
United States Department of Commerce Economic Development Administration  
in support of the  
Economic Development Administration University Center  
at the  
Community Development Institute  
Division of Extension  
University of Wisconsin-Madison.

*Any opinions, findings, conclusions or recommendations are those of the presenters  
and do not necessarily reflect the views of the  
U.S. Department of Commerce Economic Development Administration*

Community Development Institute

UW-Madison Division of Extension

# Federal Communications Commission Broadband Map - <https://broadbandmap.fcc.gov/>

- Based on FCC Form 477 Data, available at the Census Block level which can be aggregated to other geographies.
- Ability to filter access by speed, technology and year;
- **Overestimates coverage** – one household served = entire census block served;
- Maximum advertised speeds, not necessarily actual speeds.

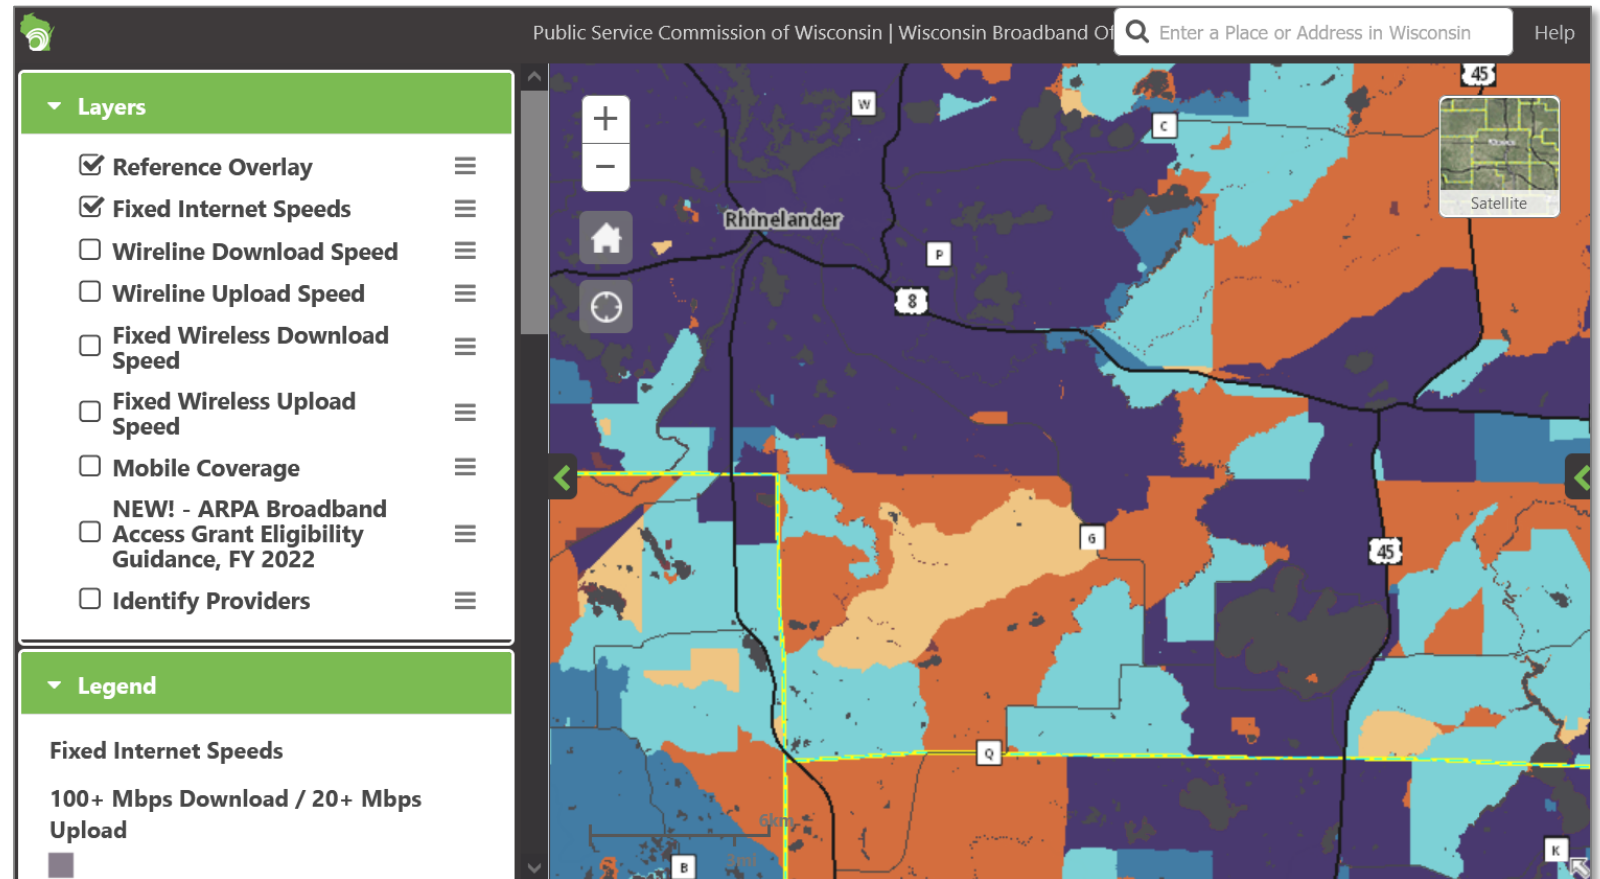

# Wisconsin Broadband Map –

## Wisconsin Broadband Office, Public Service Commission of Wisconsin

<https://maps.psc.wi.gov/apps/WisconsinBroadbandMap/>

- Based on FCC Form 477 Data supplemented with submitted provider data
- Coverage layers for wired, wireless, mobile, etc.;
- Additional information on individual providers;
- Ability to map a specific county;
- Allows maps to be exported/printed in a variety of formats.

# American Community Survey – U.S. Census Bureau

## data.census.gov

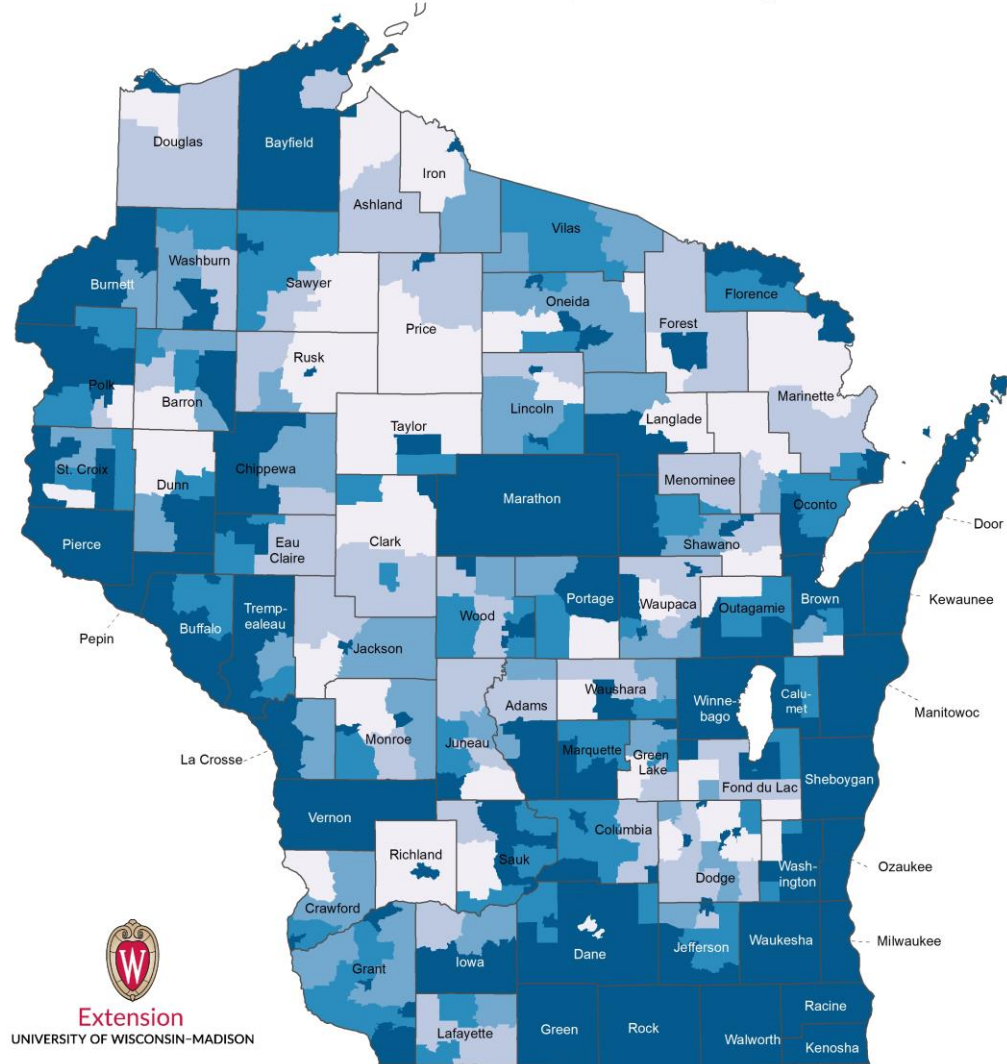

- Estimates of Internet and broadband access by total households/population and demographic characteristics;
- Some table numbers of interest: S2801, S2802, B28001, B28002, B28003, B28004, B28005, B28006, B28007;
- Available by different geographic levels (county, place, census tract, etc.);
- Estimates include margins of error.

The screenshot shows the U.S. Census Bureau's data.census.gov interface. The search bar contains 'internet access'. The 'Tables' tab is selected. The table title is 'PRESENCE AND TYPES OF INTERNET SUBSCRIPTIONS IN HOUSEHOLD'. The survey is 'American Community Survey', the universe is 'Households', and the product is '2019: ACS 1-Year Estimates Detailed Tables'. The table is for 'Wisconsin'. The table has three columns: 'Label', 'Estimate', and 'Margin of Error'. The data is as follows:

Label	Estimate	Margin of Error
▼ Total:	2,386,623	±7,340
▼ With an Internet subscription	2,064,066	±9,986
Dial-up with no other type of Internet subscription	11,036	±1,181
Broadband of any type	2,053,030	±9,733
▼ Cellular data plan	1,846,639	±11,419
Cellular data plan with no other type of Internet subscription	281,938	±7,185
▼ Broadband such as cable, fiber optic or DSL	1,649,578	±10,614
Broadband such as cable, fiber optic or DSL with no other type of Internet subscription	175,920	±6,038

## Share of Households with Access to Broadband (25/3 Mbps) June 2020 FCC Form 477 Data, Not Including Satellite

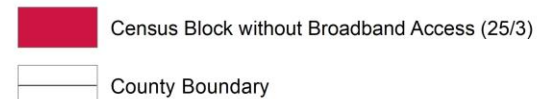

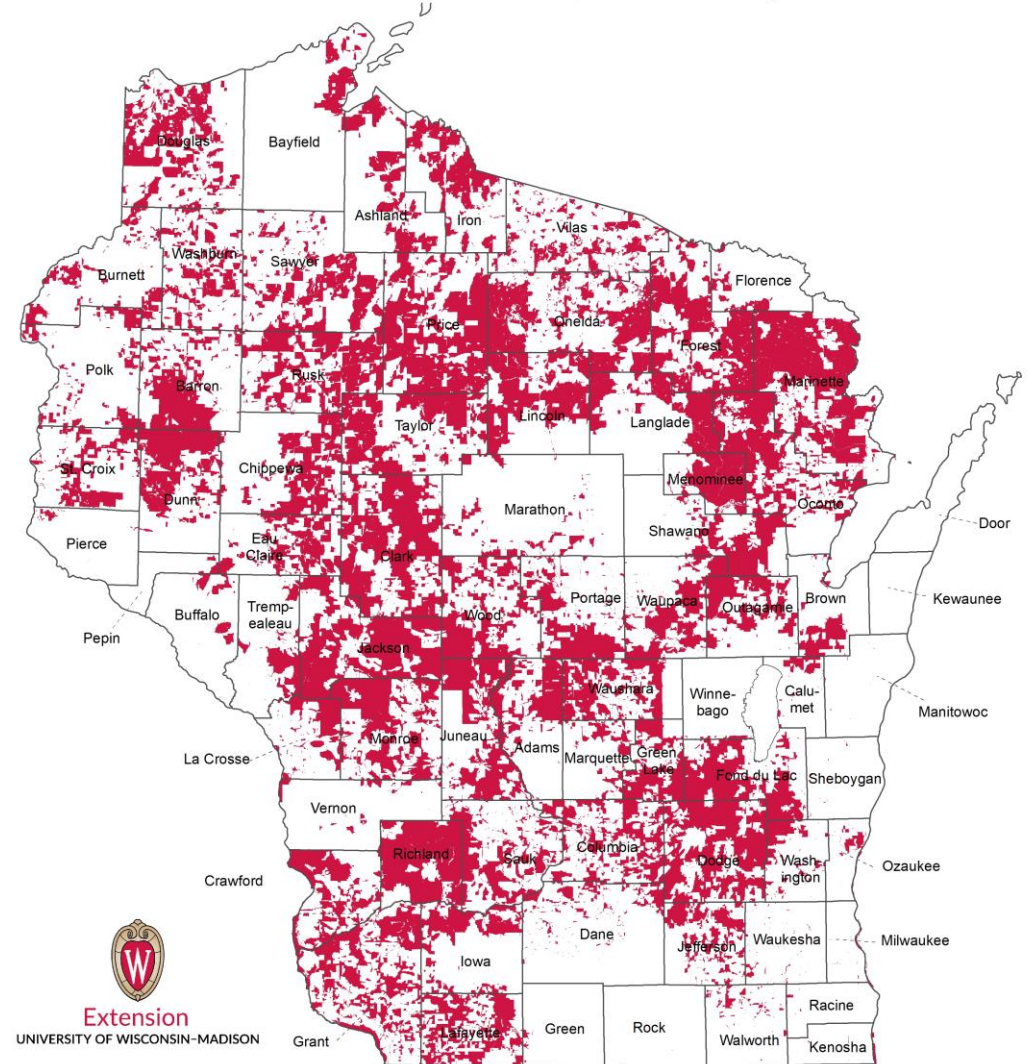

### Census Tract Share of Households with Access to Broadband (25/3 Mbps)

Data Source: Federal Communications Commission Form 477. The data are aggregated from census block data where providers report whether they serve a given census block. There may be other addresses or locations within a given census block that do not have access. Upload and download speeds are based on advertised speeds, not necessarily actual speeds reported by users.

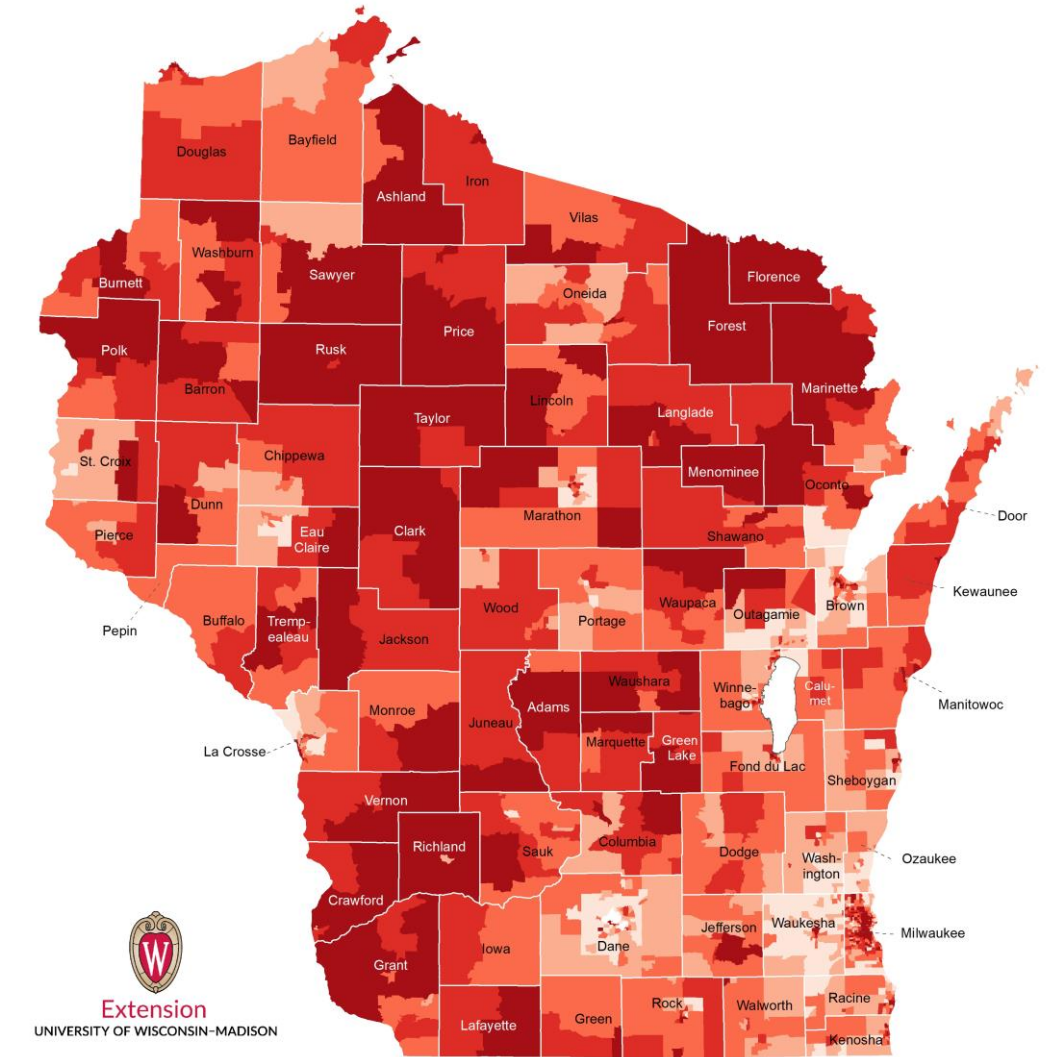

## Census Blocks without Access to Broadband (25/3 Mbps) June 2020 FCC Form 477 Data, Not Including Satellite

Data Source: Federal Communications Commission Form 477. The data are aggregated from census block data where providers report whether they serve a given census block. There may be other addresses or locations within a given census block that do not have access. Upload and download speeds are based on advertised speeds, not necessarily actual speeds reported by users.

Share of Census Tract Households without a Broadband Subscription  
(2015-2019 American Community Survey Estimates)

Data Source: U.S. Census Bureau 2015-2019 American Community Survey. An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.

\* National Average = 13.6%    Wisconsin Average = 14.0%

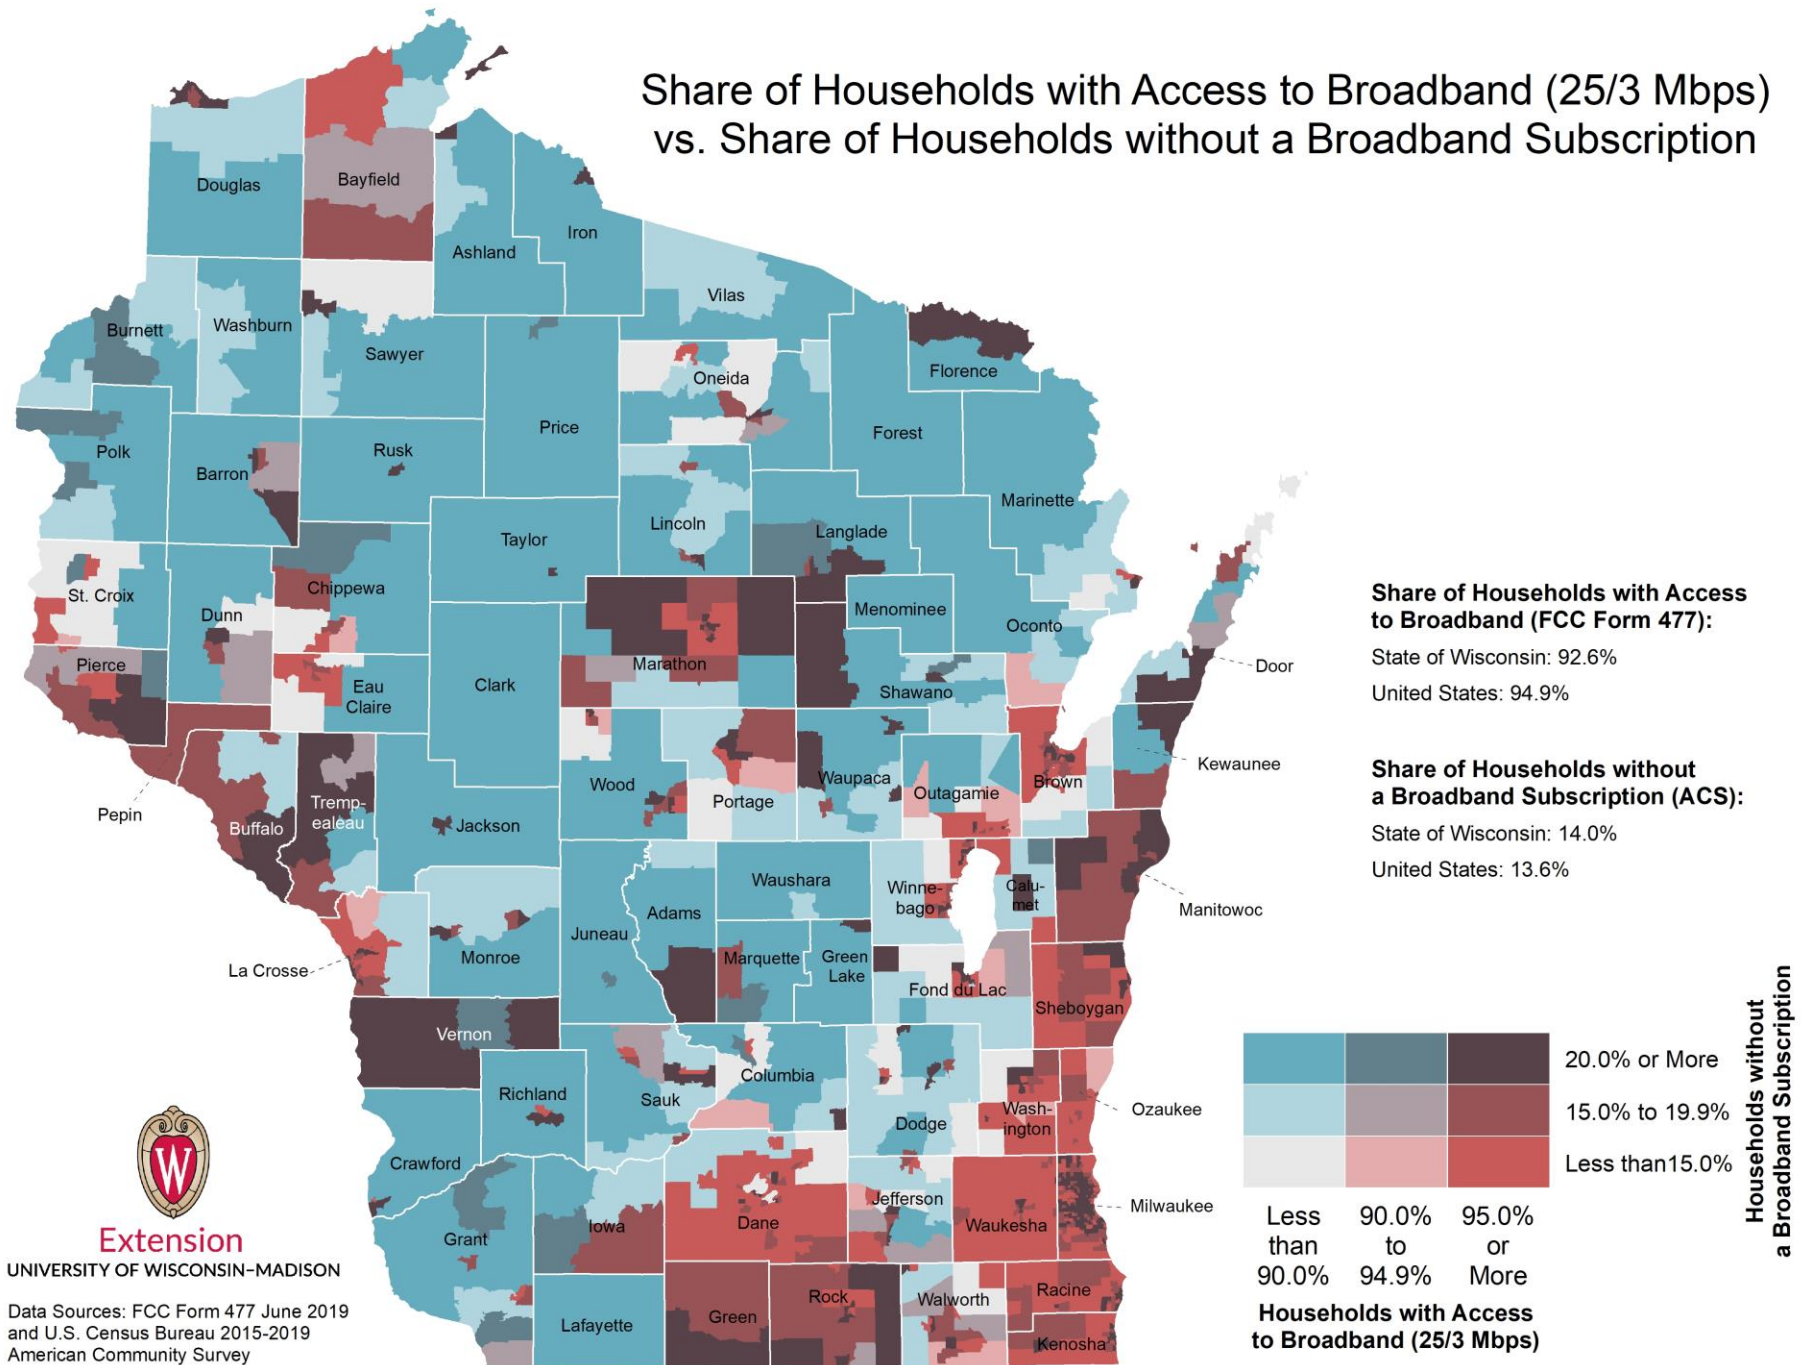

Census Tract Households with a \$75,000 Income -  
Percent without a Broadband Subscription  
(2015-2019 American Community Survey Estimates)

Data Source: U.S. Census Bureau 2015-2019 American Community Survey. An Internet "subscription" refers to a type of service that someone pays for to access the Internet such as a cellular data plan, broadband such as cable, fiber optic or DSL, or other type of service. This will normally refer to a service that someone is billed for directly for Internet alone or sometimes as part of a bundle.

\* Wisconsin and National Average = 5.6%

## Share of Households with Access to Broadband (25/3 Mbps) vs. Share of Households without a Broadband Subscription

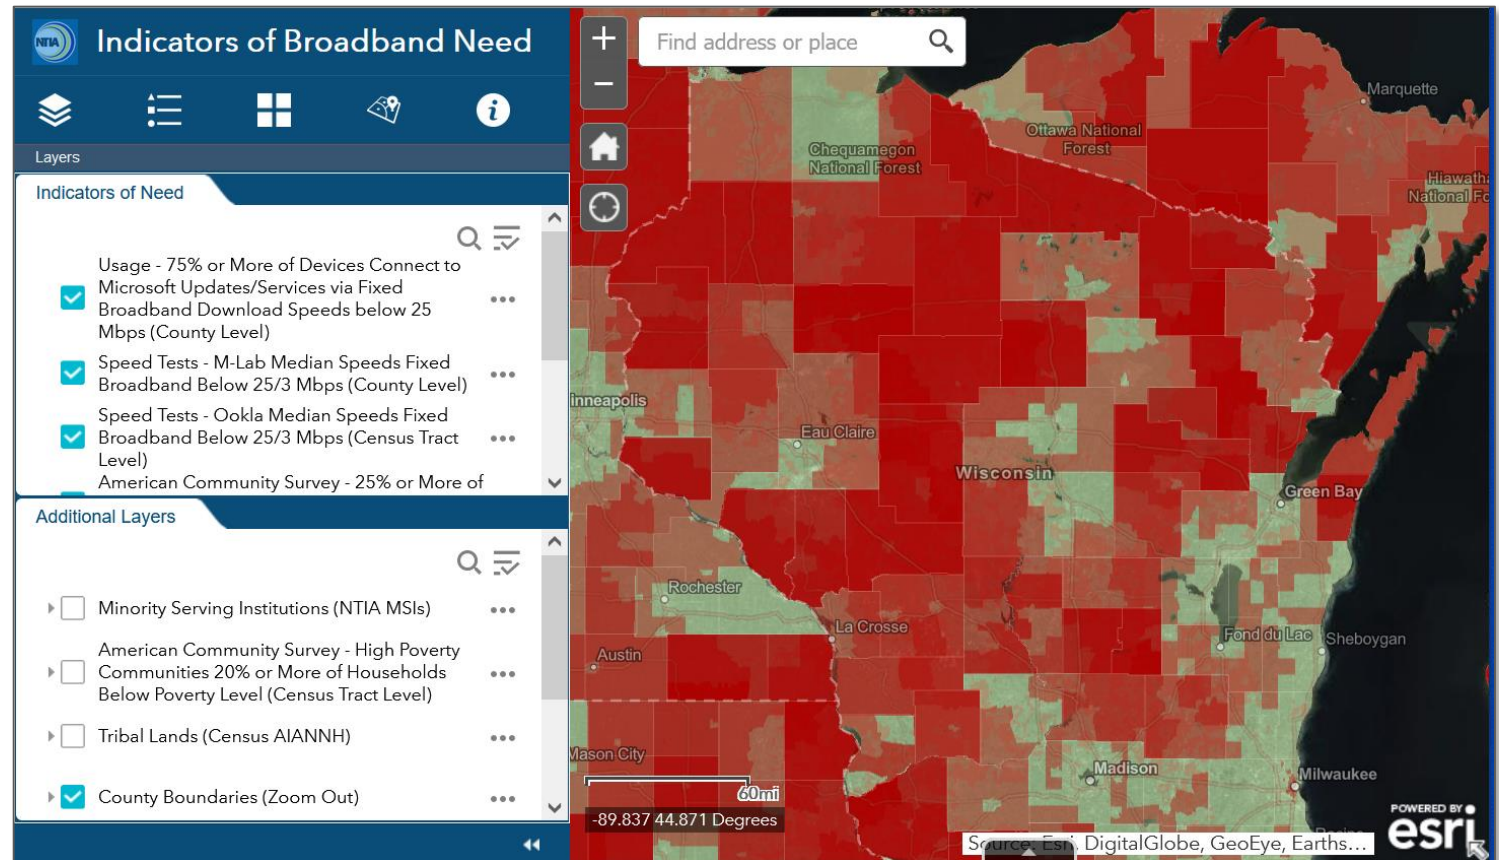

# National Telecommunications and Information Administration (NTIA)

## *Indicators of Broadband Need*

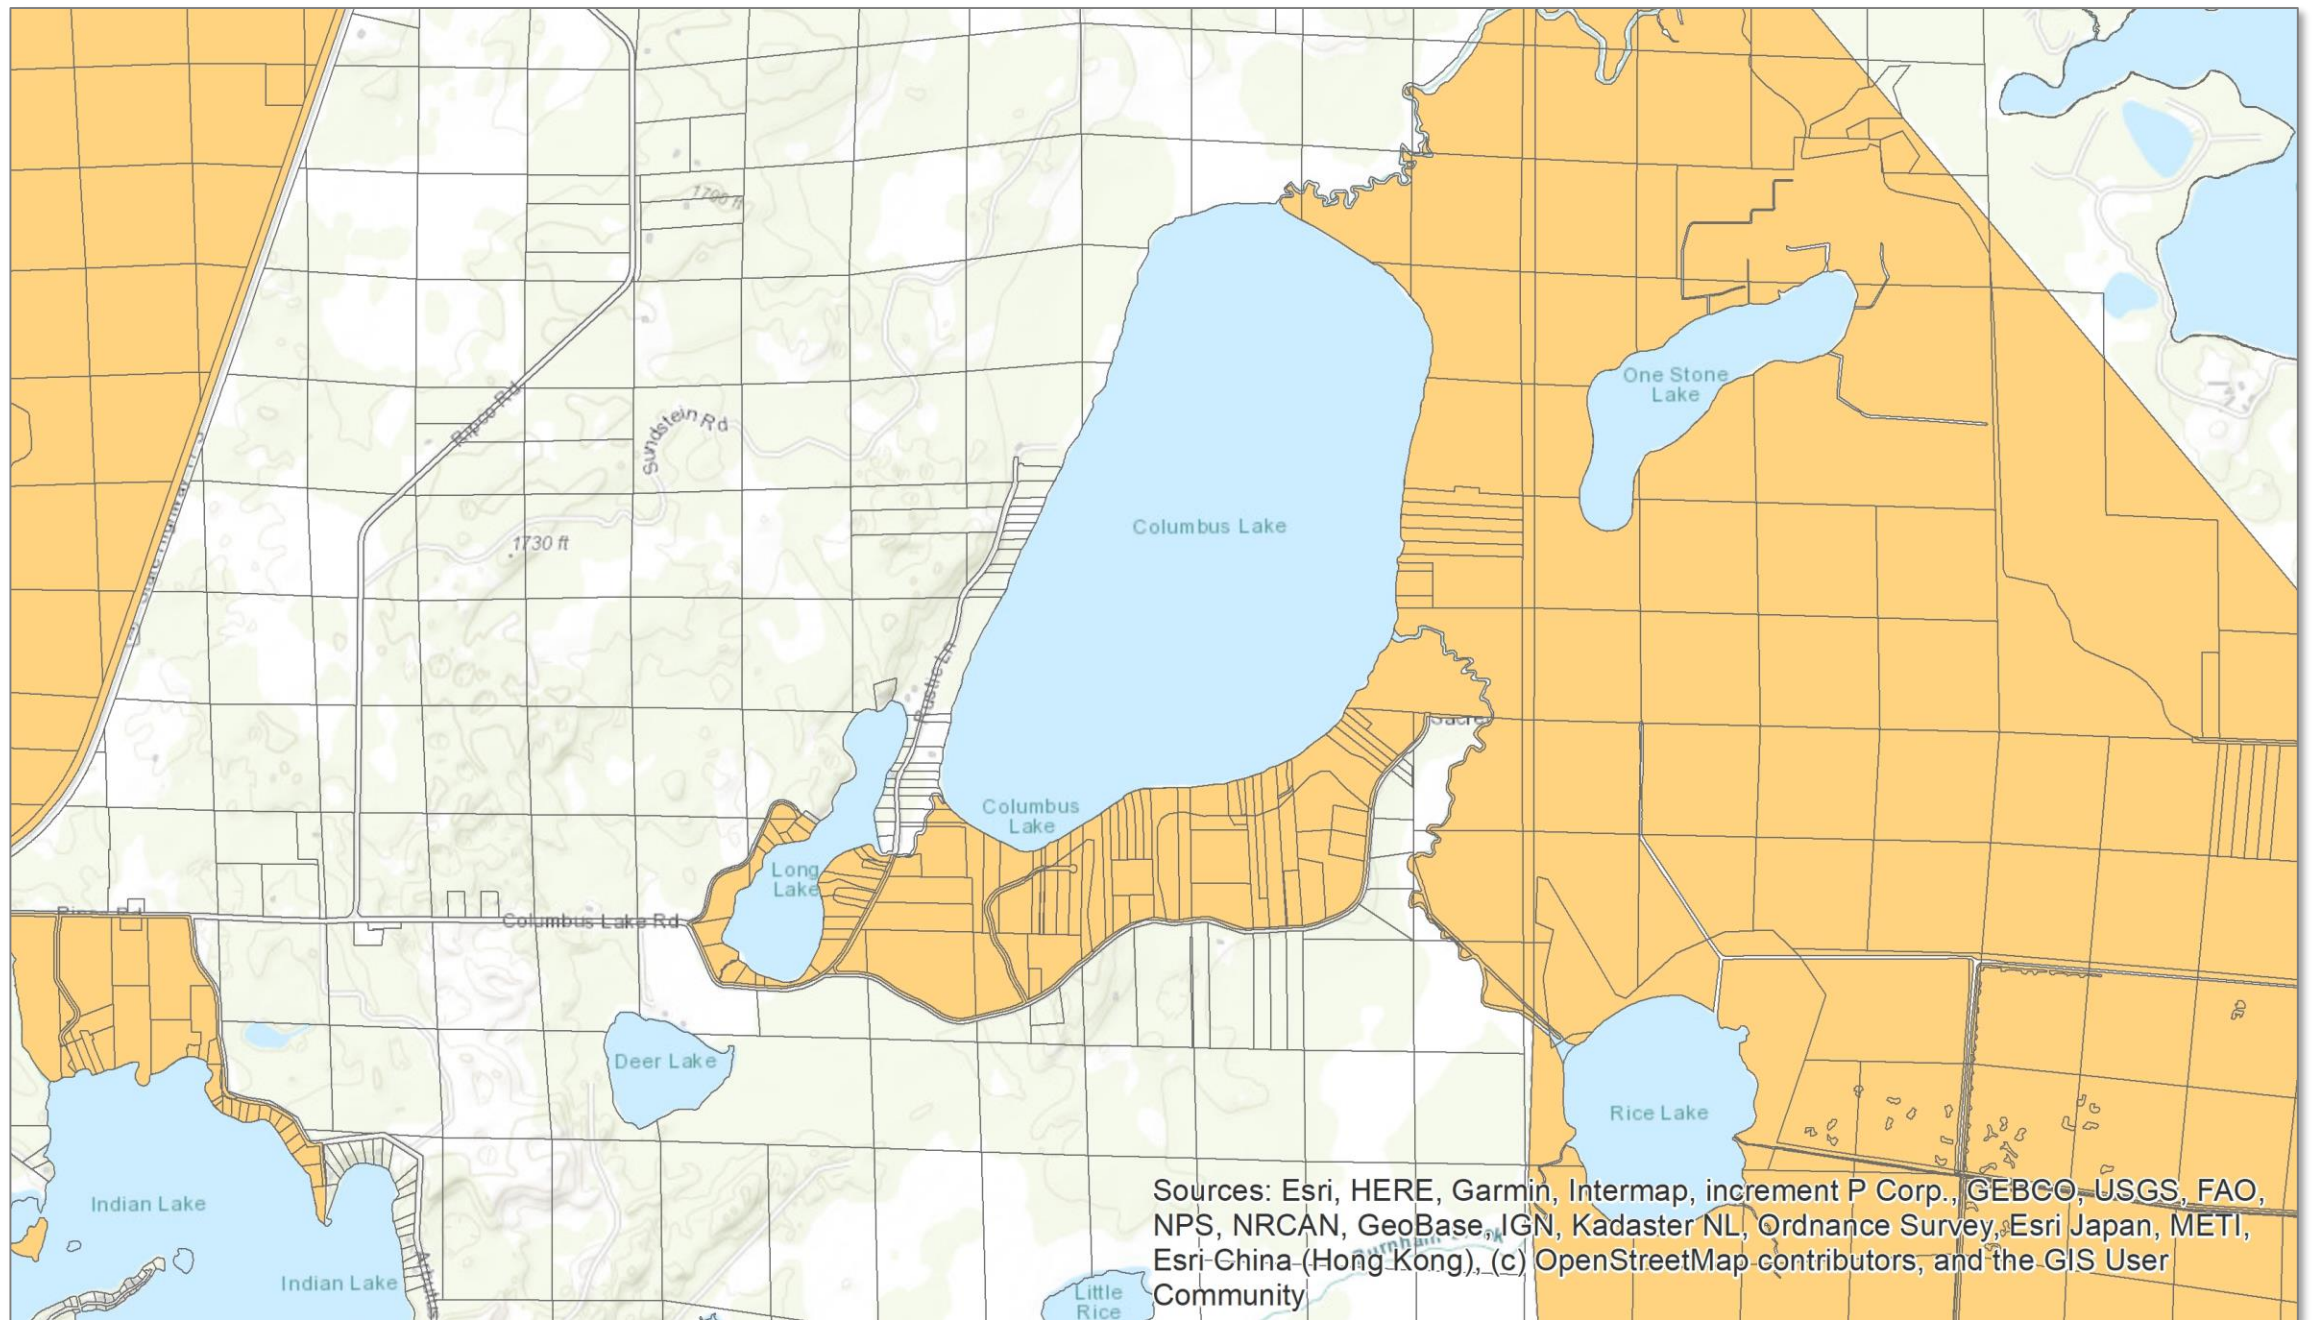

<https://broadbandusa.ntia.doc.gov/resources/data-and-mapping>

- Census Tracts with 25% of households reporting no internet access or without a device;
- Speed Tests from Ookla and M-Lab;
- Connection speeds from Microsoft;
- High poverty Census Tracts
- Eligible Minority Serving Institutions (MSIs) under NTIA's Connecting Minority Communities grant program

# What we did in Brown County

- Started Rural Broadband Sub-Committee of County Board
- Got Townships and Villages to share link to speedtest
- Social Media Blitz with link to speedtest
- QR code linking to Speedtest with printable handouts for Libraries, schools, local gov.
- Got on TV

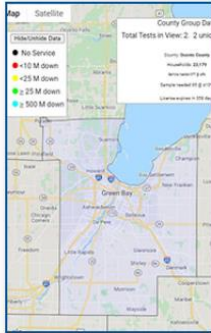

Communication: <https://www.browncountywi.gov/broadband>

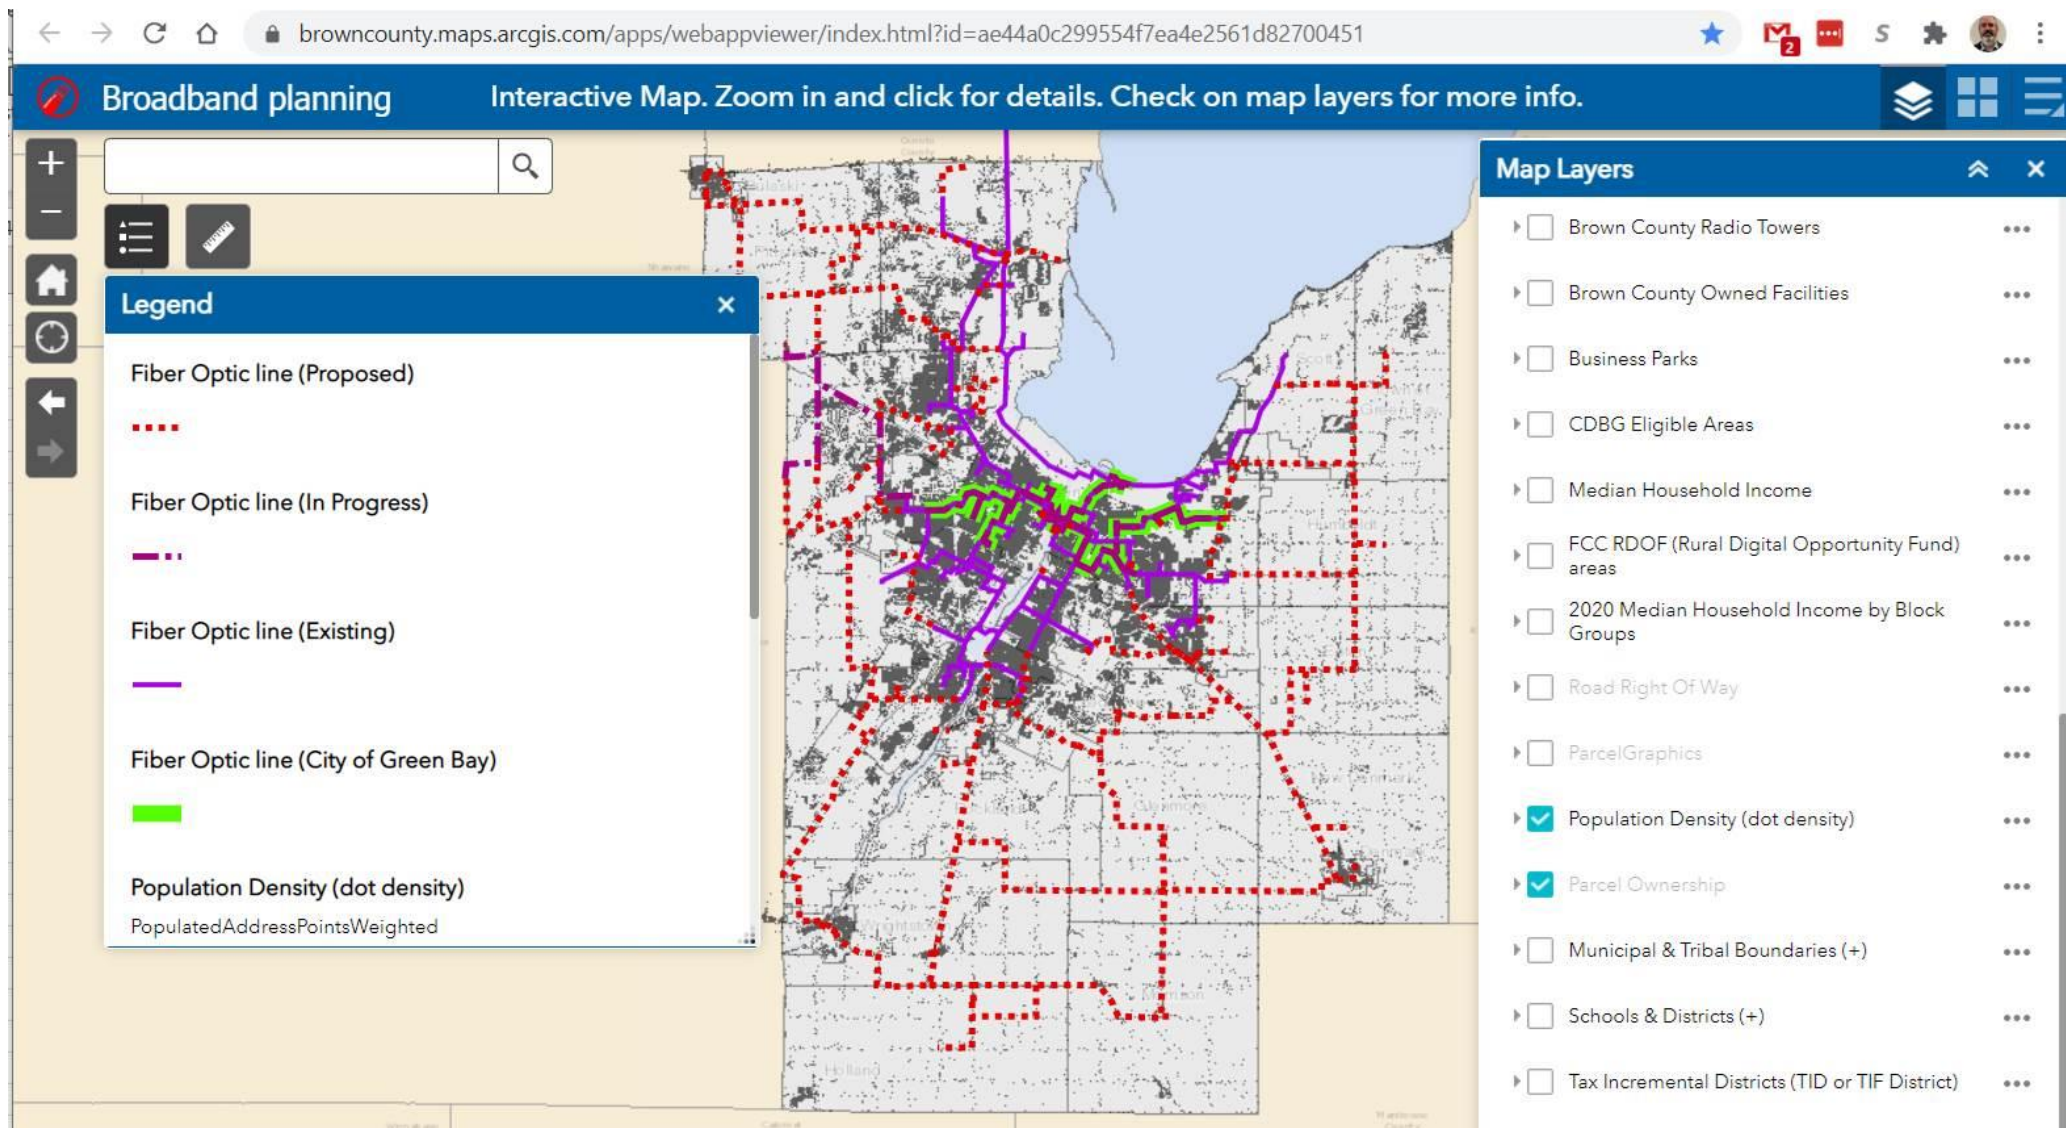

We did a vanity URL on the website to simplify public access.

The screenshot shows the homepage of the Brown County Broadband Speed Test Initiative. At the top is a navigation bar with the Brown County, WI logo (Established 1818) and links for Government, Departments, and Community. There is also a Site Search icon and a Select Language dropdown. Below the navigation bar is a large banner with a starry night sky background. The banner features the text "Brown County Broadband Speed Test" in large white font, and the Brown County seal on the right. Below the banner is a blue bar with the text "Brown County Broadband Speed Test Initiative > General Information" and a "Choose Section" dropdown menu. Below this bar is a section titled "Help Us Improve Brown County Broadband" with the text "Take our speed test to help define and advance broadband infrastructure improvement throughout Brown County - or click on our interactive photos below to learn more." Below this text are six interactive photo tiles, each with a caption and a link:

[Broadband Affordability](#)

# Data layers help ALL utilities

# Results

Direct access to raw data (even after the survey ends) we keep the data

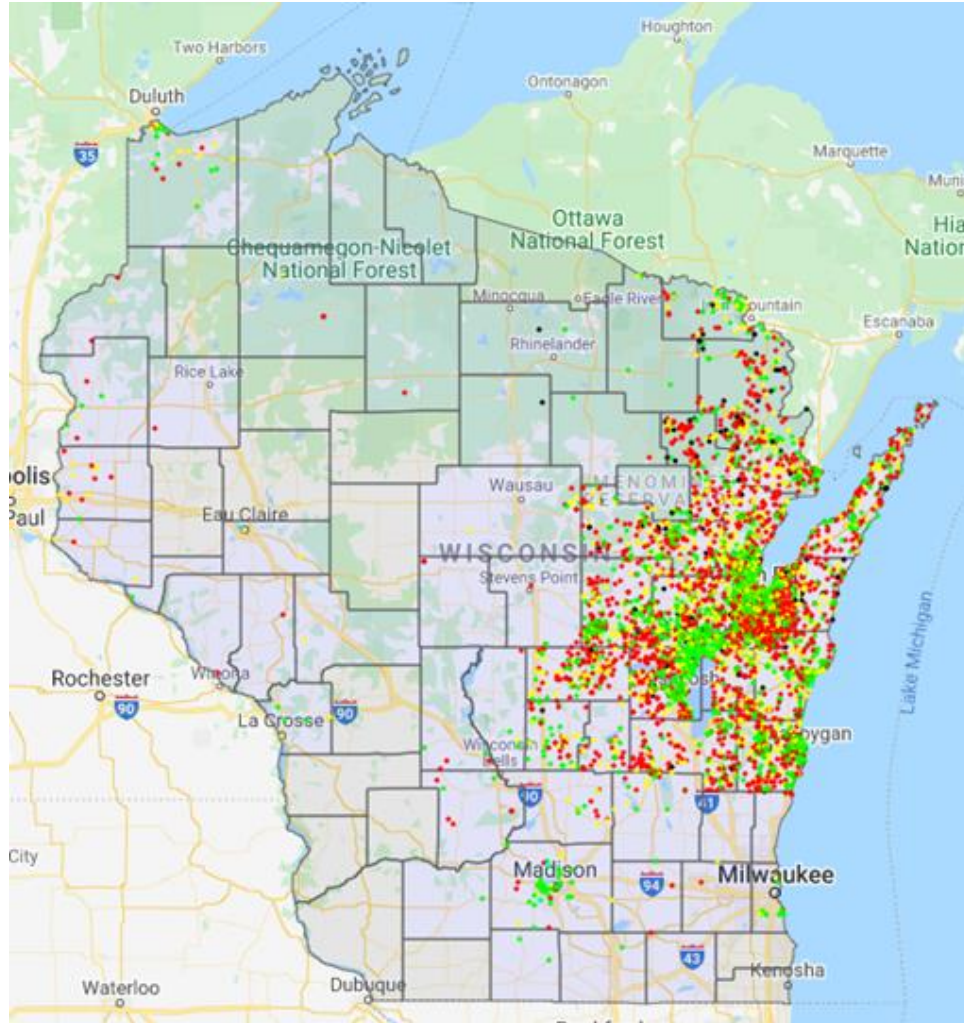

Information isn't perfect because some people clearly chose not to pay for service. Also we know some data is flawed because people could have been doing uploads/downloads.

Even with those limitations we have **good data**

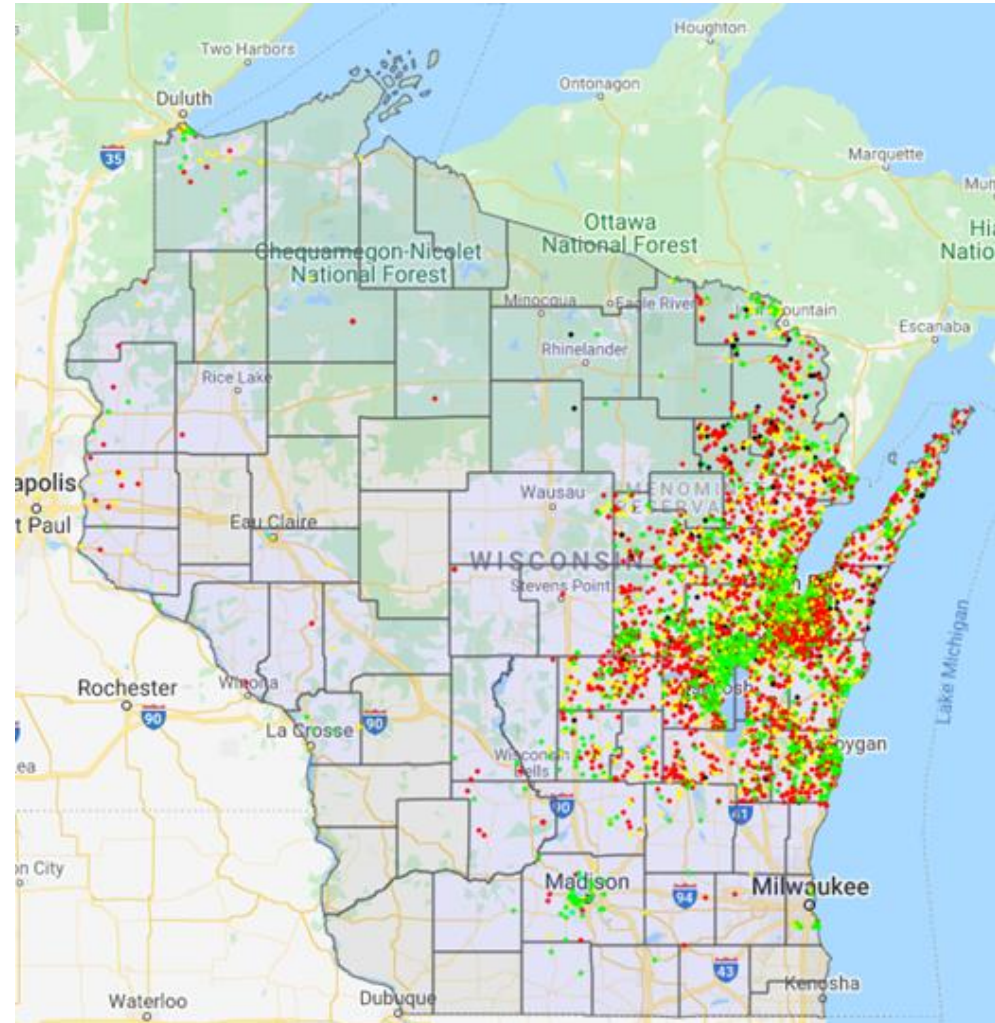

1. Found out nearly entire region is below 100mbps down and 20mbps up
2. Rural areas below even the minimum 25/3
3. We can share population data mixed with speed tests to help smaller providers know WHERE to provide services.
4. We can ensure ARPA, NTIA and other grant compliance
5. Utilities are aware of the municipal fiber and that they can lease it at cost.

# Regional Progress NewNorth 18 County Region

October 22nd

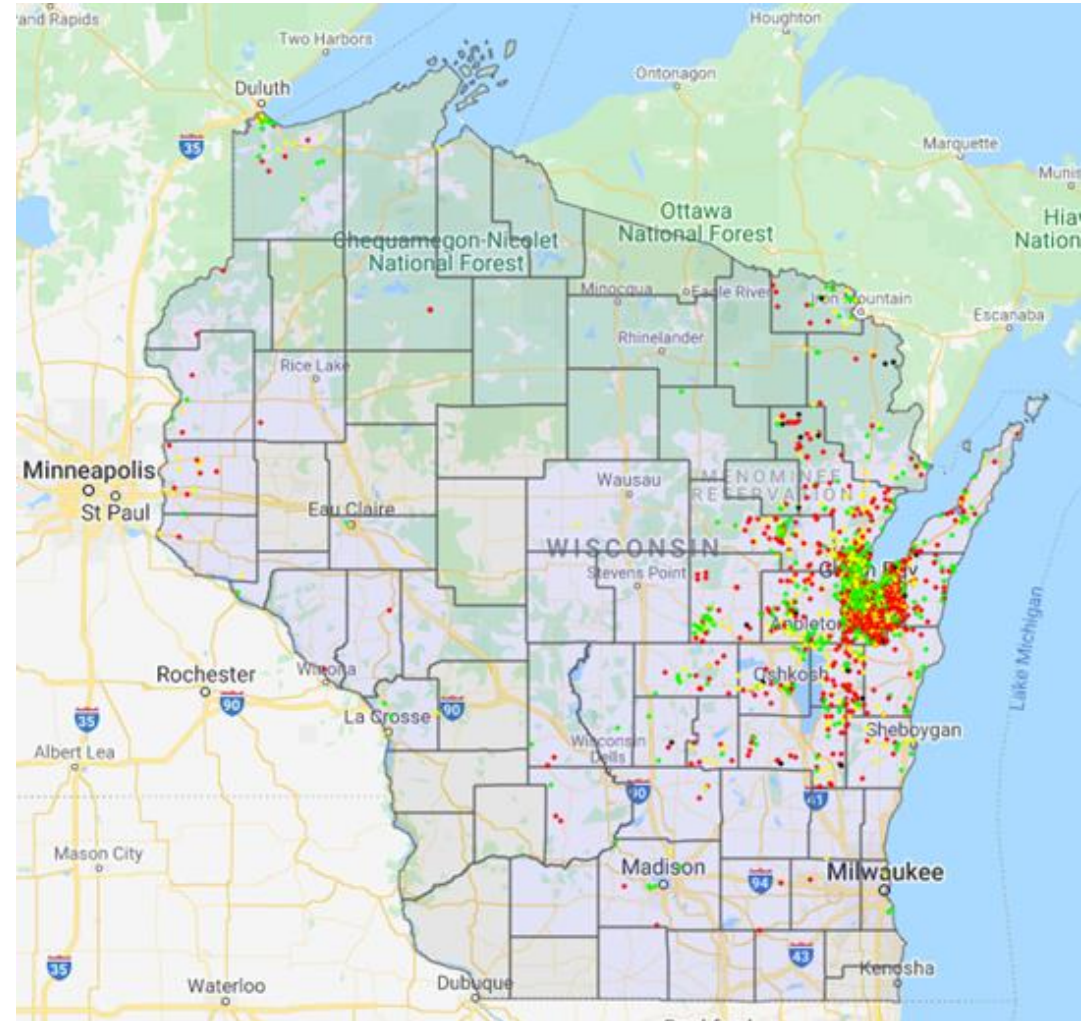

November 4th

# Regional Progress NewNorth 18 County Region

September 30th

October 15th

# NewNorth Regional Broadband Study

- Survey AND speed test
- High participation likely because of direct mailing, TV, and social media blitz
- Goal is to provide regional data similar to Brown County PLUS information regarding the NEEDs of the home or business

Partnered with Design Nine and GeoPartners LLC

More info on the NewNorth Grant:

# Community Survey

Prepared by:

Barry Hottmann

Community Development Educator

University of Wisconsin-Madison, Division of  
Extension

Iowa County, Wisconsin

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# Survey Details

- Previous broadband survey completed in 2017
- 6653 paper surveys sent out in 2020
- 1350 survey responses
  - ~250 paper surveys were returned
  - Majority received via our online survey portal
- >20% response rate
- Marketing
  - Facebook
  - Articles in local papers (press release)
  - The paper surveys themselves
  - School districts

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# Why the survey?

- Some background
  - Current situation
  - Opportunities for improvement
  - Grants, partners, resources, and services
- But really for so many reasons...
  - Education/Learning
  - Telecommuting for work
  - Telemedicine
  - Mental Health
  - Economic Development

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# Some results.

- 92% of respondents stated the internet is extremely to very important (64% in 2017)
- 43% said they are somewhat to extremely dissatisfied with their available service(s)
- 27% would be willing to pay \$81 – over \$100 per month, as compared to only 10% in 2017.
- 92% said yes or maybe regarding a willingness to pay a one-time installation fee, and 51% would pay from \$250 to over \$1000

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# Results continued...

- 267 have home-based businesses, and another 226 would like to start a home-based business in the future
- 486 would like to telecommute in the future, but over 15% were unable to telecommute due to poor or no access
- 14 pages of additional comments
- 594 interested in helping if they can

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# What did we find?

- It's not good in our rural areas and we need to be committed to improving it. – **SWWRPC GIS resource**
- It's not a one size fits all solution – in stages.
- It's going to take a committed effort
  - Strategic partnerships – public/private, healthcare, education, business and industry
  - Out of the box thinking
  - Financial support
  - Grants and planning

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# Recent study.

Broadband is becoming increasingly important to community and economic well-being. It is linked to better business performance, including rural entrepreneurship and farm profits. It is also linked to higher home values and higher educational outcomes at both the grade school and high school levels. Broadband access also corresponds to improved health outcomes, which can lead to higher worker productivity.

**Extension**

UNIVERSITY OF WISCONSIN-MADISON

# What was learned?

- Changes to the language in the survey – confusion around what is broadband
- More education prior to the survey
- Building relationships with partners
- Commitment by county
- Commitment by municipalities
- Plan ahead – shovel ready projects

**Extension**
