Tribal Updates: Instructions

Broadband network building, digital equity efforts and workforce development

- On a Post-it, write your Tribe's name and project description (One project per Post-it)
- Assess where it stands: beginning stage, launched and learning, or refining
- Place it on the wall for appropriate projects and discuss

Tribal Broadband checklist

Alignment is important

Align... Inside your Tribe

- Tribal Leadership can Endorse preferred BEAD projects but can also be part of Engagement
- Look at your "consent" policy
- Align with other program areas- housing, health, community development
- Move your strategic planning to operational status

Putting it into practice

In your folder: BEAD Endorsement Sample Language For Tribes

Extension
UNIVERSITY OF WISCONSIN-MADISON

Part of the Broadband Toolkit

BEAD Endorsements Sample Language

Purpose: To provide ideas for how to write a BEAD endorsement resolution or letter of endorsement to show support for an ISP's BEAD funding application for a specific geographic area, including county-wide.

Who should use this resource: This resource was created for county and Tribal governments. Only Tribal and county governments can provide an endorsement.

Why are we recommending resolutions? Extension suggests using resolutions to keep the process transparent and show how the community and ISP have worked together. Whether you go with the resolution + letter options or choose to simply write an endorsement letter, you can include the sample language in this document to highlight your interactions with the ISP and the steps you've taken to support broadband expansion in your county.

- Resolutions should direct a letter of endorsement to be written after the meeting. The letter should refer to the resolution.
- Endorsement letters can also be included in the meeting packet (Extension recommendation) and signed after the meeting.

Anticipated Timeline

Now through September/October 2024:

- **Engage with "Eligible entities":** Eligible entities are those who are interested in expanding broadband in your community. They will often be Internet Service Providers but could also be other entities – local and Tribal units of government, for example. Initiate conversations with eligible entities to understand their plans and consider potential partnerships that align with your identified community needs.
 - To be eligible to participate in the BEAD sub granting process, eligible entities need to go through the Letter of Intent (LOI) process and meet the following criteria: (1) agree to propose projects that will provide at least 100/20 Mbps service reliable, qualifying broadband service to all locations within the required timeline; (2) demonstrate the technical, financial, operational and managerial capacity to deploy eligible broadband projects and participate in the BEAD program; (3) agree to meet the mandated financial and programmatic requirements; (4) agree to meet the mandated ownership and organizational requirements; and (5) certify ability to comply with all applicable requirements mandated by NTIA, the Commission and 2 CFR 200 Uniform Guidance.
- **Prepare Statements:** Use this document to draft statements for the resolution or endorsement letter.

September/October through November 30, 2024:

- **County Board Agenda/Tribal Government Body Agenda:** Get the endorsement scheduled on the county board/Tribal Government Body agenda as early as possible, no later than December 18, 2024.

...With Local Governments

- Does the surrounding county have an active Broadband Committee and point person?
- Seek out providers who are already in these areas if necessary
- If you are the BEAD applicant, engagement with Towns, Cities, Counties
- The county may be working on multiple solutions from multiple providers
- Can mapping efforts be aligned?

Understand the Process

Engagement	Endorsement	Consent
<ul style="list-style-type: none">• Important if you are the BEAD applicant• Look internally at the Tribe <i>and</i> in surrounding areas• Education, health systems, economic development• Towns, cities around the Tribe	<ul style="list-style-type: none">• Important to review re: BEAD application process• Tribal Leadership must write the letter <i>not</i> the broadband committee	<ul style="list-style-type: none">• Work with Tribal Legal Council• Responsibility is on the ISP, but be aware of moments that need to be addressed now and in future

...With other Tribal Governments

- Some Federal programs are highlighting collaboration
- Collaboration creates fiscal and staffing efficiencies
- Consider broadly how you will work together
- Trust-based relationship building—make it an inter-tribal priority on broadband
